

BATTLEPOINT STUDIOS

Moderators Guide

[Logging](#) • [Evidence](#) • [Offenses](#) • [Punishments](#) • [Appeals](#)**Purpose**

A practical moderation guide for consistent logging, evidence handling, offense classification and punishment decisions. Definitions and loophole protections have been strengthened while all punishment lines remain unchanged from the supplied guide.

Use **Ctrl + F** to search for specific terms. The PDF outline and the clickable Table of Contents can also be used to jump directly to a section.

Table of Contents

1. Logging Requirements	3
2. Interpretation & Loophole Prevention	4
3. Moderator Decision Workflow	4
4. Evidence & Case Handling	4
5. Discrimination & Hate Speech	5
6. NSFW	5
7. Harassment & Toxicity	6
8. Slander & Defamation	6
9. Exploiting	7
10. Scamming, Bribery & Fraud	7
11. Doxxing	7
12. Spam & Disruption	7
13. Bug & Map Abuse	8
14. Filter Bypass	8
15. Morph Abuse	8
16. Staff Impersonation	9
17. Evidence Manipulation	9
18. Ban Evasion	9
19. Advertising	9
20. Underage Users	10
21. Unlisted & High-Risk Cases	10
22. Appeals & Moderator Conduct	10

1. Logging Requirements

A log is required for **every moderation action** you take, including:

- Verbal warnings (in game and Discord)
- Warnings (in game panel)
- Kicks
- Mutes (Discord)
- Bans

Every log must include

- The offender's **Discord ID and Roblox ID**.
- **Environment:** In game or Discord.
- **Offense type.** Minor offenses expire monthly. Otherwise, all offenses should be labelled by offense number and link the previous offense log.

MONTHLY EXPIRY: The guide states that minor offenses expire monthly, but it does not define whether this means a calendar-month reset or a rolling 30-day period. Management must use one consistent reset method and communicate it to all moderators. Moderators must not choose their own interpretation.

- Major, illegal and permanent offenses do not expire unless overturned through the appeals process.
- **Punishment** - specify whether the punishment is appealable.
- If a ban has been placed, specify the duration.
- A link to the transcript if a ticket was used.
- A link to the moderation bot command.
- An image or video showing evidence of the rule violation. Illegal and NSFW imagery/video evidence must be locked to **18+ Management**.

Logging template

Original post:

Title: Discord ID | Roblox ID

Username: Discord username | Roblox username

Alts: All info of alts/known aliases

Offenses:

Offenses Violated: Specify the rule and offense number

Punishment: Outline punishment for the offenses. (Durations, appealable, etc.)

Transcript: Link the tickets transcript if applicable.

Evidence: ALL images and videos supporting the violation unless illegal. Link to discord bot command if applicable. Image of in game command (kick/ban/warn/verbal) if applicable.

MULTIPLE OFFENSES: If multiple offenses were violated and each punishment differs, issue the **highest punishment**. Do not stack lower punishments to create a punishment that is stronger than the listed highest punishment unless Management authorises it.

EVIDENCE: Screenshot evidence may only be accepted when the **full picture** is provided. Snippets are easy to manipulate and will not be treated as acceptable evidence.

Video uploads: Streamable may be used for uploading video evidence to a linked environment.

CASE HANDOVER: If a ticket is ever too much for a staff member, regardless of rank, request another staff member to take over. This includes cases involving a particular player, rudeness, the nature of the ticket, personal involvement, or any situation where you cannot remain neutral.

2. Interpretation & Loophole Prevention

These rules are written to cover the **behaviour and intent** behind an action, not only the exact method used.

- Trying, planning, encouraging, helping, paying for, or asking another person to commit a violation may be treated as involvement in that violation.
- Using alternate accounts, friends, bots, another server, another platform, coded wording, misspellings, images, audio, or indirect messages does not make prohibited conduct allowed.
- A user cannot avoid a higher offense level by splitting one incident into several smaller actions.
- A user cannot avoid responsibility by deleting content after it has been reported or logged.
- The offense level should be based on the **most serious conduct that is supported by evidence**, not on the label a user gives their own behaviour.
- Moderators should consider context, intent, repetition, harm, previous relevant offenses, and whether the user tried to avoid moderation.
- Do not punish conduct that is not supported by the rule or evidence. When uncertain, use the Help channel or escalate to Management.

IMPORTANT: This section does **not** create new punishment ranges. It only explains how to apply the punishment ranges already listed below.

3. Moderator Decision Workflow

Use this order for every moderation case. The goal is to reach the listed punishment consistently without guessing.

- **1. Identify the conduct:** What exactly happened, and in which environment?
- **2. Check the evidence:** Is there enough reliable evidence to prove the conduct?
- **3. Match the rule:** Which offense section applies? If more than one applies, record all supported offenses.
- **4. Classify severity:** Minor, Major, Illegal, or another level specifically listed in that rule.
- **5. Check active history:** Review previous relevant offense logs and offense numbers.
- **6. Apply the listed punishment:** Do not invent, stack, shorten, or increase punishments outside the guide unless Management authorises it.
- **7. Escalate when required:** Illegal content, unclear cases, missing punishment guidance, or cases outside your authority go to Management / the Help channel.
- **8. Log the action:** Save the evidence, punishment, duration, appeal status, command link, and transcript where applicable.

CORE RULE: If the evidence does not clearly support the offense, do not guess. Request more context or escalate the case.

4. Evidence & Case Handling

- Use full screenshots whenever possible. Include usernames, timestamps, relevant messages before and after, and the channel/server context.
- Save message links, moderation command links, transcripts, and original media before content can be deleted.
- Do not crop, edit, annotate, or compress the **only** copy of evidence. Keep an original copy.
- If evidence is unclear, incomplete, or appears edited, request more context instead of guessing.
- Illegal or explicit sexual content must not be reposted into normal staff channels. Restrict it to authorised 18+ Management where required.
- Do not request passwords, login tokens, 2FA codes, private account credentials, or unrelated personal information.
- If you are personally involved in a case or cannot remain neutral, hand the case to another moderator or Management.

5. Discrimination & Hate Speech

No slurs, hate speech or discrimination based on a group or person's identity, beliefs or characteristics.

Minor Offenses

Minor discrimination or hate speech covers an **isolated offensive incident** that does not promote hatred or violence, is not part of repeated targeted behaviour, and does not call for exclusion or mistreatment of a person or group.

- Using discriminatory or derogatory language towards another user.
- Making offensive jokes or remarks.
- Using inappropriate usernames or display names containing discriminatory language.

Discord: Warn & Mute 1 hr > 1d ban > 7d ban > Alert Senior Management for review.

In game: Kick > 1d ban > 7d ban > Alert Senior Management for review.

Major Offenses

Major discrimination or hate speech involves **targeted, repeated, threatening, or promotional hateful conduct**, or conduct that encourages hatred, exclusion, discrimination, mistreatment, or violence towards individuals or protected groups.

- Displaying hateful symbols, usernames, profile images, or other content intended to promote hate.
- Repeated targeted hate speech towards an individual or group.
- Repeatedly or seriously mocking, insulting, or targeting someone based on their race, ethnicity, nationality, religion, disability, sex, gender identity, or sexual orientation.
- Advocating for violence, exclusion or mistreatment of people based on characteristics.

Discord & in game: 7-14d ban at moderators discretion > 14d ban depending on past severity or Permanent ban

6. NSFW

NSFW content includes any sexual, explicit, or otherwise inappropriate material that violates Roblox or Discord's Terms of Service. Moderators should take action based on the severity of the offense and escalate any illegal or high-risk content immediately.

Minor Offenses

Minor NSFW violations are inappropriate but do not contain explicit sexual content or pose an immediate safety risk.

- Mild sexual jokes or innuendos.
- Suggestive comments directed at another user.
- Discussions with sexual themes that are not explicit.
- Inappropriate usernames or display names.
- Repeated use of sexually suggestive emojis or memes in game or within public channels.
- Discussions revolving around drugs/narcotics when they are inappropriate for the community or violate platform/community standards. *This item is not sexual content, but remains in this punishment section until Management creates a separate restricted-content rule.*

Discord: Warn & Mute 1 hr > 1d ban > 7d ban > Alert Senior Management for review.

In game: Kick > 1d ban > 7d ban > Alert Senior Management for review.

Major Offenses

Major NSFW violations involve explicit sexual content or behavior that presents a significant risk to users. Management+ to handle all tickets containing indecent imagery.

- Sharing or requesting sexually explicit images, videos, or links.
- Posting or describing explicit sexual acts.
- Sexual roleplay or encouraging others to participate in sexual roleplay.

- Soliciting sexual services or explicit conversations.

Discord & in game: 7-14d ban at moderators discretion > 14d ban depending on past severity or Permanent ban

Illegal Offenses

Illegal NSFW violations involve criminal activity, exploitation, or behavior that presents a serious safety risk to users. These offenses require immediate escalation to Senior Management and should not be handled as standard moderation cases.

- Grooming or attempting to build trust with a user for sexual exploitation.
- Requesting, sharing, or distributing sexual content involving minors.
- Sexual extortion, blackmail, or threatening to share private/intimate content.
- Sharing or distributing illegal sexual content.
- Attempting to obtain private information from minors for exploitative purposes.
- Human trafficking or sexual exploitation-related content.

Discord & in game: Permanent ban where appropriate > Alert Senior Management for review and further action.

7. Harassment & Toxicity

Harassment includes toxic abuse revolving around targeted abuse, intimidation or repeated behaviour intended to upset, threaten or make another user uncomfortable.

Minor Offenses

- Insulting or mocking another player.
- Deliberately provoking another user to cause conflict, especially when repeated after being asked to stop.

Discord: Warn > Mute 1 hr > 1d ban > 7d ban > Senior Management review.

In-game: Kick > 1d ban > 7d ban > Senior Management review.

Major Offenses

- Sustained targeted harassment.
- Encouraging others to harass a user.
- Threatening another player.
- Harassment after multiple moderator interventions.

Discord & In game: 7d ban > 14d ban > Permanent ban depending on severity, Senior Management to review.

8. Slander & Defamation

Users must not **knowingly** spread false or misleading information, accusations, or claims about another person with the intent to damage their reputation, cause harm, or encourage others to target them.

Minor Offenses

Minor slander involves false or misleading statements that are harmful but have limited impact.

- Spreading unverified rumours about another user.
- Making false claims about a user in an attempt to cause arguments.
- Accusing someone of breaking rules without evidence.
- Making misleading statements about another user's actions.

Discord: Warn & Mute 1 hr > 1d ban > 7d ban > Alert Management+ for review.

In-game: Warn > Kick > 1d ban > 7d ban > Alert Management+ for review.

Major Offenses

Major slander involves intentionally spreading serious false allegations or attempting to cause significant harm to another person.

- Falsely accusing someone of criminal activity.
- Making false claims of serious misconduct, abuse, or exploitation.
- Organising others to target or punish a user based on false information.
- Repeatedly spreading harmful false claims after being warned.

Discord & In-game: 7–14d ban at moderator discretion > Permanent ban depending on severity and impact > Alert Senior Management for review.

Illegal false accusations will see the accuser permanently banned.

DEFINITION REQUIRED: The punishment above is preserved exactly. Because the guide does not define what counts as an **illegal false accusation**, moderators must escalate any case relying on this line to Senior Management rather than deciding the legal classification themselves.

9. Exploiting

The use or distribution of macros, exploits, scripts or unintended game mechanics to gain an unfair advantage is prohibited. For this rule, a **macro** means automated input used to gain an unfair gameplay advantage; ordinary accessibility or device software should not be assumed to be an exploit without evidence of unfair use.

- Executing scripts.
- Using exploit software.
- Bypassing anti-cheat systems.
- Distributing or promoting exploit software.

In game: Permanent ban > Alert Senior Management for review and further action.

10. Scamming, Bribery & Fraud

Users must not deceive or manipulate others for personal gain.

- Performing a service for payment from another user (both parties are guilty).
- Phishing attempts / Sharing malicious links.
- Attempting to steal another user's account or information.

Discord & In game: 7–14d ban at moderator discretion or a permanent ban depending on severity.

11. Doxxing

Respect the privacy of all community members. Sharing, requesting, threatening to share, or collecting **private identifying information** without consent or for harmful purposes is prohibited.

- Doxxing or sharing another user's private information without consent.
- Sharing addresses, phone numbers or email addresses.

LOOPHOLE PREVENTION: Threatening to publish private information, asking another person to publish it, or sharing enough pieces of information to identify someone may still be treated as doxxing when supported by evidence.

Discord & in game: Permanent ban where appropriate > Alert Senior Management for review and further action.

12. Spam & Disruption

Spam or disruptive behaviour that negatively impacts the community is not permitted.

- Repeated messages or emoji spam.
- Excessive use of capital letters.
- Flooding channels or in game chat.
- Mass mentions or ping spam.
- Intentionally disrupting events or community activities.
- Ghost ping

Discord: Warn & Mute 1 hr > 1d ban > 7d ban > Alert Management for review.

In game: Warn > Kick > 1d ban > 7d ban > Alert Management for review.

13. Bug & Map Abuse

Abusing bugs, glitches, or unintended map mechanics to gain an unfair advantage or access areas that are not intended to be accessible is prohibited. Players should report bugs rather than use them for personal benefit.

- Escaping the intended boundaries of the map.
- Accessing out-of-bounds areas.
- Using glitches to bypass barriers, doors, or restricted areas.
- Exploiting bugs to gain an unfair advantage over other players.
- Using unintended mechanics to avoid damage, capture, restrictions, or normal gameplay.
- Repeatedly abusing known bugs after being instructed to stop.
- Encouraging or assisting other users in exploiting bugs or map glitches.

In game: Warn > Kick > 1d ban > 7d ban > Permanent ban depending on severity and impact.

14. Filter Bypass

Attempting to bypass Roblox's chat filter or safety systems is prohibited. Players must not use alternative methods to send content that would normally be blocked by Roblox's moderation systems.

- Using symbols, spacing, numbers, or alternate characters to bypass filtered words.
- Intentionally misspelling words to avoid detection.
- Using coded language or phrases to communicate filtered content.
- Repeatedly attempting to bypass the filter after being warned.

CLARIFICATION: The underlying message may also violate another rule. If so, record both offenses and apply the highest listed punishment, as required by the multiple-offense rule.

In-game: Warn > Kick > 1d ban > 7d ban > Permanent ban depending on severity and intent.

15. Morph Abuse

Morph abuse involves using character morphs, outfits, or customization systems in an inappropriate or unintended way. Players should not use morphs to disrupt gameplay, bypass community standards, or display inappropriate content.

Minor Offenses

Minor morph abuse involves inappropriate or disruptive use of morphs that disrupt the game play for others.

- Using oversized or obstructive morphs to hide saber and player movement.
- Using morphs to intentionally block pathways, entrances or other players.

In-game: Warn > Kick > 1d ban > 7d ban > Alert Senior Management for review.

Major Offenses

Major morph abuse involves using morphs to display inappropriate content, violate community standards, or intentionally bypass moderation rules.

- Using NSFW or sexually inappropriate morphs.
- Using morphs displaying hate symbols, slurs, or discriminatory content.
- Creating or using morphs intended to harass or target another user.
- Using inappropriate morphs to bypass Roblox moderation systems.

In-game: 7–14d ban at moderator discretion > Permanent ban depending on severity and impact.

16. Staff Impersonation

Impersonating a moderator or representative is prohibited when the user attempts to **deceive, intimidate, manipulate, or exercise fake authority**. An obvious joke with no reasonable attempt to deceive should not automatically be treated as this offense.

- Pretending to be a staff member in a way intended to make others believe the claim.
- Using misleading usernames or display names to create a false impression of staff authority.
- Impersonating staff to scare or harass a user.
- Impersonating staff to manipulate others to do their bidding.

Discord & In game: 7–14d ban at moderator discretion > Permanent ban depending on intent and severity.

17. Evidence Manipulation

Evidence manipulation means intentionally changing, hiding, fabricating, or presenting evidence in a way designed to mislead moderation, save oneself from punishment, or get another user punished.

- Editing screenshots or media in a way intended to change their meaning or mislead staff.
- Deleting messages after reports (where evidence still exists).
- Fabricating evidence against another user.

CLARIFICATION: Normal message deletion is not automatically evidence manipulation. The moderator must have evidence that the deletion or alteration was intended to mislead moderation or interfere with a case.

Discord & In game: Permanent ban depending on intent and severity. Management to review.

18. Ban Evasion

Creating or using alternate accounts to bypass a moderation action is prohibited.

- Joining on alternate accounts after a ban.
- Using another account to communicate while muted or banned.
- Assisting another user in evading moderation.

LOOPHOLE PREVENTION: An account does not need to be newly created to count as an alternate account. Using an existing account, borrowed account, or another person as a proxy may still count when used to bypass moderation.

Discord & In-game: Permanent ban on alternate accounts > Extend the original punishment to original duration.

19. Advertising

Advertising external communities, services, products, or content without permission is prohibited. This includes attempts to redirect users away from the community or promote unrelated content.

- Sharing Discord invite links without permission.
- Promoting other Roblox groups, games or communities.
- Advertising social media accounts, websites or services.
- Repeatedly self promoting content in public channels.

- Sending unsolicited advertisements through direct messages.

Discord & In-game: Warn > Mute/Kick > 1d ban > 7d ban > Permanent ban depending on severity and intent.

20. Underage Users

Users must follow Roblox and Discord age requirements and should not attempt to bypass age restrictions or place themselves or others at risk. Moderators must rely on the community's stated age requirement and platform age-verification status; they must not guess a user's age from appearance, voice, writing style, or profile design.

Discord & In game: Remove underage users from our community until they are able to show their account has been age verified. Do not request their date of birth.

PRIVACY: Do not ask a user to send identification documents, a date of birth, school information, or other private information. Use the platform's age-verification status where applicable and escalate uncertain cases.

21. Unlisted & High-Risk Cases

Some serious situations are not assigned a specific punishment range in this guide. Moderators must **not invent a punishment** for them. Preserve evidence, stop immediate harm where possible, and escalate to Management / the Help channel.

- Coordinated server raiding, bot raids, or server nuking.
- Malicious mass reporting or organised disruption that is more serious than the normal Spam & Disruption examples.
- Knowingly filing a false moderation report where the conduct does not clearly fit Slander or Evidence Manipulation.
- Impersonating a normal user to scam, frame, or seriously damage that user.
- Serious real-world threats, swatting threats, DDoS threats, or other safety threats that go beyond ordinary harassment.
- Evasion of moderation actions not clearly covered by the existing Ban Evasion examples.

NO NEW PUNISHMENT: This section does not create a punishment range. These cases require Management review because no specific punishment was provided in the source guide.

22. Appeals & Moderator Conduct

All appealable punishments may be appealed through the designated appeal process.

- Moderators should not debate punishments publicly.
- Moderators should not overturn another moderator's action without approval from Management+.
- If a punishment is not clearly listed, if the offense level is uncertain, or if evidence is incomplete, refer the case to the Help channel within the Staff Hub.
- Do not promise an appeal outcome before the appeal is reviewed.
- Keep discussion professional and avoid public arguments with the punished user.
